-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 20 May 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-54 is/are pending in the application.
- 4a) Of the above claim(s) 11-30,35-42,47-54 is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-10,31-34 and 43-46 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some \* c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date 10/18/2004.
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-10 & 43-46 are rejected under 35 U.S.C. 102(b) as being anticipated by Sekiya (# JP 2000-211124).

Sekiya discloses a liquid jet head comprising:

- A nozzle element having nozzles from which a recording liquid ejected to a recording medium, wherein the recording liquid contains fine particles of a pigment, wherein the fine particles of the pigment contained in the recording liquid are no less than 1% by weight ([0092]), wherein each of the nozzles has an area that is less than  $500 \mu\text{m}^2$  (see Abstract; [0015]), wherein each of the fine particles of the pigment has a diameter satisfying a relation  $0.0005 \leq D_p/D_o \leq 0.02$  (see Table: 1-3), wherein "Dp" represents the diameter the fine particles of the pigment and "Do" represents a size of each of the nozzles, wherein when the nozzle element ejects the recording liquid onto the recording medium, a contact angle the recording liquid stops changing when 100 ms or less elapses after the recording liquid contacts the recording medium ([0065]), wherein the fine particles of the pigment are smaller than fibers of the recording

Art Unit: 2853

medium, wherein the fine particles of the pigment are smaller than spaces between the fibers of the recording medium ([0064]).

- The fine particles of the pigment are dispersed in the recording liquid by including a dispersant in the recording liquid or surface processing the fine particles of the pigment (see Examples; [0068]).

- The fine particles of the pigment contained in the recording liquid range from 2% to 10% by weight, wherein a solid content of the recording liquid including the fine particles of the pigment contained the recording liquid is no more than 15% by weight ([0092]).

- The liquid jet head further including one or more other nozzle elements respectively having nozzles from which one or more other recording liquids are ejected to the recording medium (figure: 1-11).

- The one or more other nozzle elements are integrally formed to thereby form a head unit (figure: 5-9).

- The head unit has a recording head portion and a recording liquid container portion, wherein the recording head portion and the recording liquid container portion are integrally formed or detachably attached to the recording head portion, wherein the recording liquid container portion is detachable according to type of the one or more other recording liquids (figure: 5-11).

- The liquid jet head employs a thermal liquid jet method, which uses heat for ejecting recording liquid therefrom ([0032]).

2. Claims 31-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Sekiya (# JP 2000-211124).

Sekiya discloses a liquid jet recording apparatus including a liquid jet head including:

- A nozzle element having nozzles from which a recording liquid ejected to a recording medium; a carriage mounting the liquid jet head; a guiding rod guiding the carriage; a conveying roller conveying the recording medium; a holding roller holding the recording medium (figure: 6), wherein the recording liquid contains fine particles of a pigment, wherein the fine particles of the pigment contained in the recording liquid are no less than 1% by weight ([0092]), wherein each of the nozzles has an area that is less than  $500 \mu\text{m}^2$  (see Abstract; [0015]), wherein each of the fine particles of the pigment has a diameter satisfying a relation  $0.0005 \leq D_p/D_o \leq 0.02$  (see Table: 1-3), wherein "Dp" represents the diameter the fine particles of the pigment and "Do" represents a size of each of the nozzles, wherein when the nozzle element ejects the recording liquid onto the recording medium, a contact angle the recording liquid stops changing when 100 ms or less elapses after the recording liquid contacts the recording medium ([0065]), wherein the fine particles of the pigment are smaller than fibers of the recording medium, wherein the fine particles of the pigment are smaller than spaces between the fibers of the recording medium ([0064]).

- The fine particles of the pigment are dispersed in the recording liquid by including a dispersant in the recording liquid or surface processing the fine particles of the pigment (see Examples; [0068]).

- The fine particles of the pigment contained in the recording liquid range from 2% to 10% by weight, wherein a solid content of the recording liquid including the fine particles of the pigment contained the recording liquid is no more than 15% by weight ([0092]).

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manish S. Shah whose telephone number is (571) 272-2152. The examiner can normally be reached on 8:00am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen D. Meier can be reached on (571) 272-2149. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
